

# Bramdenton FL

## LOCAL SEO MONTHLY SEARCH VOLUME METRICS

### LOW VOLUME: 0 – 50

This is the easier keyword category to rank for because its typically less competitive, but not always! In some cases, we see good results within in 90 days when targeting for this category for our clients.

### MEDIUM VOLUME: 51 – 100

A more competitive category, that at times can be just as hard to rank for as the large volume local keywords depending on your market and the competition.

### MEGALODON VOLUME: 301+

This kind of volume is hard to find for Local SEO, and almost only found in the larger markets. Depending on your budget and current ranking position this may not be the best choice to focus on right out the gates, but when you do find one make sure it's added to your things to rank for list.

### LARGE VOLUME: 101 – 300

This is what most people are looking for, they're keywords with higher volume and a more competitive market. Large volume keywords should be the focus of your long-term ranking strategy.
